

A New Standard for Quality Care

A revolutionary product, The Aegis Microbe Shield Treatment Program reduces the risk of contracting MRSA, H1N1, SARS, Hepatitis, the Avian Flu, the common cold and flu viruses as well as bacterial microbes from high-touch surfaces.

Application Sites

- High-Touch Areas
- Workout Area
- Washrooms
- Onsite Offices
- Laundry Rooms
- Lobby
- Air filters and vents
- Fabric Surfaces
- Key Boards
- Desks
- Entry/Exit Doors

Registered by Health Canada, The Aegis Microbe Shield Treatment Program can:

- Protect high risk patients/employees by reducing the risk of transfer of microbes from high touch surfaces.
- Provide effective infection control on high touch surfaces.
- Reduce employee absenteeism due to illness and infection.
- Increase cost efficiency and reduce environment impact.
- Provide a quality and safer environment for visitors and employees.
- Reinforce your commitment to a higher standard of employee care.
- Reduced environmental impact – physical vs. chemical "Kill".
- Hypoallergenic with no effects or irritation.
- Effective solution for germ and mould prevention.
- Is completely non-leaching and continues to work long after it is applied, in between your regular cleanings.

Creating Healthier and Safer Environments

According to government statistics workers in Canada took an average of 9.3 sick days in 2013, with people in health care and social assistance taking the most days off, a report from the Conference Board of Canada shows. Government estimates peg those costs of absenteeism in the economy at approximately \$16.6 billion annually, based on average salary costs for the days lost.

That figure does not include the cost of replacement workers.
