

# 'TAILGATE TOOLKIT'

[thetailgatetoolkit.ca](http://thetailgatetoolkit.ca)

The Tailgate Toolkit seeks to spread awareness, promote help-seeking, and reduce the stigma surrounding substance use within the construction industry.

2021 was the worst year on record for drug poisoning deaths in BC. This has a particular impact on our industry as **over 50%** of those employed at the time of their deaths were members of the trades, construction, and transport industries.

Through our toolbox talks, supervisor training, industry-specific support group, and our regional support guides we aim to provide employers and employees the tools they need to address substance use in construction.
